Claims 3 and 16-20 lack novelty and do not involve an inventive step in the light of document 1 cited in the international search report. Document 1 indicates a HLA-A24-restricted peptide with an activity whereby it induces CTLs, which comprises a modified amino acid sequence that includes modifications to the amino acid residues of the amino acid sequence represented by SEQ ID NO: 4.

Claims 1-20 and 22-24 do not involve an inventive step in the light of document 2 cited in the international search report and newly cited document 3. Document 2 discloses peptides derived from WT1, which comprise the amino acid sequences represented by SEQ ID NO: 7, 8, 9, 51 and 52 of the present application. Document 3 indicates that modifying the P2 site of a peptide derived from WT1 with tyrosine will augment the function whereby the
